

UC Davis Plant Biology Graduate Group Friday Seminar Series, Fall 2016

Oct 7 **Daniel Runcie** (UC Davis) “The genetics of flowering time in dynamic seasonal environments.” Host, Andrew Groover (agroover@ucdavis.edu).

Oct 14 **Daniel Zilberman** (UC Berkeley) “DNA transposons generate introns on genomic scales.” Host, Tsung-Chi Chen (tcch@ucdavis.edu).

Oct 21 **Virginia Walbot** (Stanford University) “Building a Maize Anther using Cell-Cell Signaling.” Host, Katie Murphy (kmmurphy@ucdavis.edu).

Oct 28 **Genome Center Halloween Symposium John Yates** (Scripps College)
****Seminar will take place at the Genome Center Auditorium**
Host, Dinesh-Kumar (spdineshkumar@ucdavis.edu).

Nov 4 **Hatem Rouched** (Biochemistry and Plant Molecular Physiology, INRA-Montpellier, France) “Computational approaches to identify networks that integrate the response to multiple stresses in plant.” Host, Siobhan Brady (sbrady@ucdavis.edu).

Nov 11 **Veteran’s Day**

Nov 18 **Jill Wegrzyn** (University of Connecticut, Institute for Systems Genomics)
“Computational approaches to understand forest tree genome evolution and complexity”
Host, Andrew Groover (agroover@ucdavis.edu).

Nov 25 **Thanksgiving Holiday**

Dec 2 **Devin Colemann-Derr** (UC Berkeley and USDA PGEC) “The effect of drought and host selection on the grass root microbiome” Host, Joe Edwards (@ucdavis.edu).

Seminars are from 12:10-1:00 in Room 1022 of Life Science Addition
Please contact the local host if you would like to meet with the speaker.
